

Facts & Figures, August 2006

## **Business Everywhere, the world first range of integrated mobility solutions for all remote workers**

<b>User needs</b>	<i><b>“Be able to work comfortably from anywhere, like at the office”</b></i>	<i><b>“Be alerted and reachable while travelling”</b></i>	<i><b>“Be more efficient and quicker in my work, on the move, anywhere”</b></i>
<b>Usages</b>	- E-mail on PC - IP voice and conferencing - Instant messaging - Remote access to the company intranet	- Mobile voice - SMS / MMS - Mobile e-mail	Professional applications (maintenance, logistics, SFA, CRM)
<b>Preferred device</b>	PC	PDA or Smartphone	PC or PDA

---

### **Description**

- An integrated offering for all companies, enabling mobile employees to use their laptops (PC Pack) and/or PDAs (PDA Pack) to access their work environment (Internet, intranet, messages and professional applications) over all access networks (3G, EDGE, WiFi, ADSL, GPRS and PSTN), with the same simplicity, comfort and security as at the office.

---

### **Target users**

- The employees of companies of all sizes who wish to access the Internet and their work environment, anytime, anywhere.

---

### **Benefits**

- **An integrated offering:** with a single contract and a single invoice for all access technologies (3G, EDGE, WiFi, ADSL, GPRS and PSTN).
- **A user friendly and innovative connection kit:** a unique interface, and a single password regardless of the access network.
- **Free choice of the best access network depending on one’s mobility situation:**  
For example: WiFi at the hotel and in public places, ADSL at home, 3G and EDGE when travelling in areas covered by these networks, and PSTN and GPRS everywhere else.

- 
- **The broadest geographical coverage thanks to the France Telecom Group's presence and partnerships:**
    - **PSTN:** 140 countries
    - **GPRS:** 144 operators in 100 countries & territories
    - **EDGE:** 61 operators in 59 countries
    - **3G:** 44 operators in 38 countries
    - **WiFi:** 17,000 Orange hotspots in France and 34,000+ hotspots through our partnerships in 61 countries
    - **DSL:** 6 countries
  - **Control over costs thanks to prices** adapted to the number of mobile employees and to the global volume of their consumption.
  - **Customer services**
    - Support for the administrator in the deployment and management of their mobile user fleet,
    - End-user assistance for installation and training, and a 24x7 user hotline.
  - **Embedded security**
    - Control of user access, data protection, simple and strong authentication, end-to-end managed security of the company network.

---

**Voted "Best New Service"**

- Business Everywhere won the *Best New Service* award at the World Communication Awards organized by Total Telecom on October 3, 2005.

---

**References**

- Number of end users in France : 443,000 (June 2006)
- References: French Ministry of Health, Gaz de France, Steria (9th European IT services company), Chateauform (seminar organiser), Securitas (largest French security group), Eurovia (a world leader of roadworks), Metsäliitto Group (tenth largest forest industry group in the world) and Universal Music Group (the world's leading music company)

---

**Business Everywhere outside France**

- Business Everywhere is already available in Poland, Belgium, Spain Slovakia, Switzerland, Romania and the United Kingdom for companies of all sizes (SMEs to large) and on a worldwide specific basis for multinational companies.
- By end 2006, Business Everywhere will be available in the Netherlands.
