Orange financial results

Ramon Fernandez

Deputy CEO, Chief Financial and Strategy Officer

26 April 2016

disclaimer

This presentation contains forward-looking statements about Orange. Although we believe these statements are based on reasonable assumptions, they are subject to numerous risks and uncertainties, including matters not yet known to us or not currently considered material by us, and there can be no assurance that anticipated events will occur or that the objectives set out will actually be achieved. Important factors that could cause actual results to differ from the results anticipated in the forward-looking statements include, among others: the success of Orange's strategy, particularly its ability to maintain control over customer relations when facing competition with OTT players, Orange's ability to withstand intense competition in mature markets and business activities, its ability to capture growth opportunities in emerging markets and the risks specific to those markets, fiscal and regulatory constraints and changes, and the results of litigation regarding regulations, competition and other matters, the success of Orange's French and international investments, joint ventures and strategic partnerships in situations in which it may not have control of the enterprise, and in countries presenting additional risk, risks related to information and communications technology systems generally, including networks or software failures due to cyberattacks, damage to networks caused by natural disasters, voluntary acts or other reasons, loss or disclosure to third parties of customers data, health concerns surrounding telecommunications equipment and devices, Orange's credit ratings, its ability to access capital markets and the state of capital markets in general, exchange rate or interest rate fluctuations, and changes in assumptions underlying the carrying amount value of certain assets and resulting in their impairment. More detailed information on the potential risks that could affect our financial results will be found in the Registration Document and in the annual report on Form 20-F filed on April 4, 2016 with, respectively, the French Autorité des Marchés Financiers (AMF) and the U.S. Securities and Exchange Commission. Forward-looking statements speak only as of the date they are made. Other than as required by law (in particular pursuant to sections 223-1 and seq. of the General Regulations of the AMF), Orange does not undertake any obligation to update them in light of new information or future developments.
